## FULL LIFT SAFETY VALVE zARMAK

body material	nominal pressure	nominal diameter	max. temperature	ex.index
A grey cast iron	C 16 bar	DN 20-150	300°C	6101 6101.11A
C nodular cast iron	E 40 bar	DN 20-100	350°C	6101S 6101S.11A
F cast steel	E 40 bar	DN 20-150	450°C	6102
F cast steel	F 63 bar	DN 20-400	450°C	6103
F cast steel	G 100 bar	DN 25-100	450°C	6104

\*Detailed types of valves are listed on page 18

CE 0045 CE 1433

### FEATURES

- flange dimension according to PN EN 1092
- valves made according to PN EN ISO 4126-1
- high tightness

For soft seal valves:

- quiet work of valve
- raised tightness of closure

### APPLICATION

- industry
- heating
- power engineering
- refrigeration and air conditioning

### MEDIA

- steam
- compressed air
- neutral gases and steams

## BASIC DATA OF SENSOR

- Working range [ mm ] 3 (M8); 6 (M12); 10 (M18)
- Supply voltage [ V ] 10 + 30 DC
- Protection grade IP67 (M8); IP68 (M12 and M18)
- Working temperature -25 + +70°C
- Standard length of cable [mm] 2000
- The other executions of sensor for special order after co-ordination with manufacturer.
- Onto client's wish are used sensors working in range of temperature: -25 + +230°C

## NOTES

- If condensate accumulates, the blow-out installation should be drainholed in the lowest point. The drainhole in valve's body is made only on special request of the client. In case of liquids, the blow-out installation should be inclined.
- The valve should be mounted in vertical position.
